

**Sand-Cast Aluminum Valve Covers for
Pre-1986 Small Block Chevy Engines
Perimeter Mount, Standard Bolt Pattern
Designed for Ford Logos**

These valve covers feature:

- Raised fins with pad designed for Ford Oval or Ford Script logos. These are part number 8357-6 and 8357-7, respectively, shown top in polish finish and bottom in blue powder coat.
- Strong sand-cast aluminum construction
- .160" thick wall
- Precision-machined .200" thick gasket flange to provide uniform clamping force on the gasket -- much less prone to leak than stock covers which are typically made of .035" stamped steel
- Mid-height design will clear most roller and/or ratio rockers
- Location provided on intake manifold side with cast-in internal baffles -- can be machined for breathers, oil fill, & PCV valves
- Available in several finishes: as-cast aluminum, black or blue powder coat, or polished
- Valve covers weigh 4lb each.
